TRUST IN SCIENCE

A five-part series exploring why we trust science. What and whom are we actually trusting? Do we even want to know?

PART 4

WHOSE BUSINESS IS IT ANYWAY? SCIENCE AND THE CORPORATE WORLD

The business world enjoys close access and even control over the trusted spaces of scientific enquiry, and many people find this unsettling. This panel discussion will include voices representing government, business and academic research to address the impact that business interests have on science and our trust in it.

Moderator:
Françoise Baylis,
Canada Research Chair in
Bioethics and Philosophy at
Dalhousie University.

Panelist:
Dr. Ford Doolittle,
Canada Research Chair in Comparative
Microbial Genomics, and Professor of
Biochemistry and Molecular Biology at
Dalhousie University.

Panelist:
Dr. Siddika Mithani,
Director General
of the Veterinary Drugs
Directorate, Health Canada.

Panelist:
Dr. Aled Edwards,
senior research scientist,
University of Toronto and CEO
of the International Structural
Genomics Consortium.

Thursday, March 1, 7:30 pm
Alumni Hall, University of King's College
6350 Coburg Road

The series will be recorded by the CBC radio program "Ideas".
