# TRUST IN SCIENCE

**A five-part series exploring why we trust science.  
What and whom are we actually trusting? Do we even want to know?**

## PART 5

### OUR ROLE: SCIENCE AND THE PUBLIC TRUST

As constant consumers of the results of scientific and technological innovation, can we also be citizens in the democratic governance of science? This final lecture will explore various ways available to the public to discern and determine, for ourselves as individuals and collectively, what it means for us to 'trust in science', as we face the challenges of the 21st century.

Speaker: **Dr. Sheila Jasanoff**, Pforzheimer Professor of Science and Technology Studies at Harvard University.

**Thursday, March 15, 7:30 pm**  
**Alumni Hall, University of King's College**  
**6350 Coburg Road**

the series is being recorded by the cbc radio program "ideas".
