TRUST IN THE NEW SCIENCES:

REMAKING THE HUMAN

PART ONE **ENGINEERING SELFHOOD IN THE 21ST CENTURY**

Are we on the verge of an age when we can re-engineer the human being according to our own designs? Will nature no longer set the limits on the kinds of minds, bodies and persons we can become? This lecture will consider the implications of the ways we govern ourselves, and the new dilemmas of rights and obligations that confront us in light of advances in the new sciences of genomics, neuroscience and biomedicine.

DR. NIKOLAS ROSE, Martin White Professor of Sociology and Director of the BIOS Centre for the Study of Bioscience, Biomedicine, Biotechnology and Society, London School of Economics and Political Science

OCTOBER 13 | 7:00 PM
